

ZION SOLUTIONS GROUP

JOB OPENING

Position: Industrial Engineer

Reporting To: EVP & Co-Founder

The Job:

The Industrial Engineer position will be a key piece in helping customers drive intelligent change. Within this position, you will work with customers and the engineering team to evaluate data and process flows and make recommendations on technologies, storage requirements, and different operational flows. You will be part of an exciting team working in an exciting industry.

Essential Duties and Responsibilities:

- Embrace the Zion Solutions Group Vision, Live the Mission and Values
- Work with Customers to understand the challenges at hand
- Understand the client's expectations, existing processes, and current systems.
- Visit job sites during the proposal phase to understand the current solution and identify what is and isn't working.
- Request and analyze raw order data files from customers.
- Build process flows to optimize an existing facility or support a new facility.
- Be able to articulate the "why" of a solution with comfort and conviction
- Understand new and emerging technologies as well as non-traditional solutions
- Assist in solution development by providing the right data inputs.
- Assist in the sales process by participating in presentations to the customer.
- Creation of budget and schedules for concepts created
- Creation of a Conceptual Description of Operations
- Assist and share work duties across the Zion team as we grow

Minimum Knowledge, Skills and Abilities Required:

- An Abundance of Positive Attitude and Aptitude
- Bachelor's Degree in industrial engineering or equivalent experience is preferred.
- 5+ Years' Experience in the Material Handling Industry or equivalent experience is preferred.
- Working knowledge of Conveyor, Racking, Storage Systems and Advancing Technologies (Robotics, Goods to Person Systems etc.)
- Strong background and/or skillset in data manipulation methodologies.
- Well-developed verbal / interpersonal skills with strong organizational, problem solving and time management skills.
- Ability to handle several tasks simultaneously and comfortably in a fast-paced environment.
- Proficiency in Microsoft Office applications (Word, Excel, Access, PowerPoint, Project, Visio).
- Industry knowledge related to supply chain, logistics, material handling systems, and software such as WMS, WES, WCS, CCS, ERP, etc. is preferred.

- Ability to work without direct supervision with a high degree of independence
- Travel up to 15% or as needed.

Working Conditions:

- Fun, with a side of work, is to be expected daily
- Work outside of normal business hours can happen from time to time as we get busy closing business!
- Get to experience Operations up close and personal. This means:
 - Occasional climbing on steps, scaffolding and/or mezzanines.
 - Standing or walking for a long period of time.
 - Occasional lifting and carrying of objects weighing up to 75 pounds may be required
 - Possible exposure to noise levels exceeding recommended DBA levels.
- Working with computers and computer programs for a long period of time.
- Working in office, warehouse, and manufacturing facilities
